

Running an ASDAN provision — the Playbook

This playbook shows how a full ASDAN provision runs end to end in a real alternative-provision school: what pupils work towards, how a year is structured, and how the free lessons and Register at madebymatt.uk turn everyday teaching into claimed credits without an evening of paperwork. It now carries three worked pathways — BUILD, GROW and LAUNCH, 79 lessons between them. Lift one whole, or take the parts that fit your setting.

The whole process in five moves

- 1. TEACH.** Every session uses a ready-made lesson — whiteboard slideshow, three difficulty tiers, printable worksheets. All free at madebymatt.uk → Lessons.
- 2. MARK.** At the start of the session, tap the register on the Today page. Present banks the lesson's minutes automatically; Late banks half.
- 3. BANK.** Hours become credits by ASDAN's own arithmetic: 10 guided hours = 1 credit. The app does the sums; the register marks are the record.
- 4. EVIDENCE.** When a pupil produces something real — a budget, a snack, a pitch, a plan — photograph it into the app. Tagged, referenced and filed in seconds.
- 5. CLAIM.** When the readiness board shows green, print the portfolio audit, hours tally and tutor record — each under your school's header — and the claim goes off.

The one rule that comes before everything

Pupils must be registered with ASDAN before their evidence counts. Registration goes through your centre's ASDAN coordinator. If a pupil isn't registered yet, teach and keep the register anyway — but flag it the same week.

Who does what

The lead teacher owns the provision: lessons, programme structure, the Register, enrolments, and the final claim paperwork.

Delivery & support staff run and support sessions, take the register taps, capture evidence photos in the moment, and flag anything odd.

The coordinator registers pupils on the right units, advises on levels, and handles submissions to ASDAN.

What the pupils are aiming for

The spine of this provision is the ASDAN Personal Effectiveness Qualification (PEQ) — a nationally recognised, credit-based qualification about the skills that make everything else possible: knowing yourself, working with others, managing money and time, solving problems, and seeing a project through. It runs at Entry 3, Level 1 and Level 2, so every pupil has a rung they can reach and a rung above it. Around it sit ASDAN Short Courses and AQA Unit Award evidence for the more practical strands.

Three worked pathways, one ladder

The same site carries three provisions at different altitudes. Each names what a learner is working toward — but the target, unit and level always stay provisional until registration:

Pathway	Lessons	Works toward (provisional)
BUILD	31	An Award — ASDAN Short Courses (Living Independently, FoodWise...) and AQA Unit Award, with personal-challenge unit awards. The foundational rung; no PEQ registration.
GROW	18	A PEQ Extended Award — Level 1 with an Entry 3 floor. The Stretch tier is written to Level 2 evidence standard, so a flying pupil is a registration decision, not a re-teach.
LAUNCH	30	A PEQ Level 1 Certificate — the full-year scheme of work homes all six Level 1 PEQ units across the year. Autumn 1 completes Communication skills (ComSk1).

Levels, honestly

Unit and level attribution is provisional and remains the centre coordinator's decision. Nothing is promised to a learner until the ASDAN registration is confirmed. This is a worked example from a real SEMH classroom, not an ASDAN-endorsed mapping. Autumn 1 banks Communication skills (ComSk1) — the only unit code named here; every other unit and level is left to the coordinator against the official specification.

Why it matters

It counts. Credits build to a real award on a national framework — for many pupils in alternative provision, the first formal qualification of their lives.

It's Preparation for Adulthood. The content IS the EHCP territory: money, food, work habits, community, independence. Evidence for ASDAN is very often evidence for annual reviews too.

It's achievable every single week. Hours bank from attendance; evidence comes from doing. A pupil who turns up and takes part is succeeding, visibly, on the readiness board.

The nurture year — BUILD

BUILD runs six vocational slots each week — 31 lessons, all free on the site. Weeks 1–6 follow a planned arc per slot; Weeks 7–8 are consolidation — finishing, photographing and banking evidence through the BUILD ASDAN Hub. The slots deliberately feed each other: what D&T makes, the Community Project gives away.

Strand	The six-week arc	What it banks
CAREERS	My Strengths → Jobs in My Community → Skills Employers Want → Routines & Reliability → Applying Myself → Career Profile → After Year 11	Practical careers evidence + cross-banks Living Independently
VOCATIONAL (D&T)	Community Upcycling: Workshop Audit → Blueprint → Core Cut → Assembly → Finish → Handover (pallets → planters & wildlife boxes)	Practical evidence feeding the Community Project
LIVING INDEPENDENTLY	Where Money Comes From → Notes & Coins → Needs vs Wants → Everyday Prices → Simple Budget → Shopping & Change	ASDAN Living Independently module
FOODWISE	Food Groups → Balanced Plate → Reading Labels → Kitchen Hygiene → Prepare a Snack → Plan a Meal	ASDAN FoodWise module
COMMUNITY PROJECT	Choose Our Asset → The Site's Need → Team Roles → Partner Update → Plan Handover → Handover & Benefit	Community evidence — receives the D&T build
DUKE + ENTERPRISE	Choose Challenges → Kindness → Eco → Independence → Social Enterprise → Pitch & Reflect	AQA Unit Award personal challenges

Each slot grows a classroom artefact wall across the term — a Strengths Wall, Money-Smart Board, Balanced-Plate Gallery, Project Board and Challenge Wall. Photograph a wall and you've captured six weeks of dated, attributable evidence in one frame. Nothing resets at half term: the Register's credits count the whole course.

The core year — GROW

GROW runs three interlocking strands a week — 18 lessons. The clever part: the Community Project and Enterprise strands both bank the PEQ unit Delivering a Project — two different real projects, one shared qualification target — while the Personal Effectiveness strand builds the self-knowledge that holds it together. Weeks 7–8 are consolidation: an evidence audit, then a portfolio-signing audit week through the GROW ASDAN Hub.

Strand	The six-week arc	What it banks
PERSONAL EFFECTIVENESS	Knowing Myself → Goals That Work → Working With Others → Managing Myself → Solving Problems → Present My Progress	Core PEQ skills · the Effectiveness Board
COMMUNITY PROJECT	Our Patch, Our Say → Choose the Need → Roles, Steps, Resources → First Contact → Risk & Ready → Green Light	Delivering a Project (plan phase)
COMMUNITY & ENTERPRISE	Helps and Earns → Spot the Gap → Our Idea, Our Users → Money In, Money Out → Brand and Pitch → Pitch Day	AQA Unit Award enterprise + PEQ core skills

How the year flows

Autumn is the plan phase. The Community strand ends at “Green Light” — a fully planned, risk-assessed, partner-contacted project ready to run in the spring.

The Stretch tier is the ladder. Every lesson’s Stretch task is written to Level 2 evidence standard — a pupil working at Stretch consistently is building a Level 2 case for the coordinator conversation. It is a registration decision, never a promise.

Before the project leaves the building: off-site community work needs your school’s trips process with proper notice; if Enterprise trades food, food-safety and allergy checks come first.

The Level 1 year — LAUNCH

LAUNCH is the newest and highest-reaching provision — five ASDAN strands a week, 30 lessons across Autumn 1, on the same studio-deck chassis as BUILD and GROW. Its full-year scheme of work homes all six Level 1 PEQ units, so the year's ceiling is a PEQ Level 1 **Certificate** where GROW caps at an Extended Award. Autumn 1's Personal Effectiveness strand completes Communication skills (ComSk1); the other four strands bank ASDAN Short Courses and AQA Unit Award alongside.

Strand	The six-week arc	What it banks
PERSONAL EFFECTIVENESS	Choosing My Level → What Makes Communication Effective → Active Listening & Feedback → Plan an Activity → Deliver & Evidence → Review & Sign Off	PEQ Level 1 — Communication skills (ComSk1) complete
CAREERS & EXPERIENCING WORK	Know Myself for Work → World of Work & Sectors → Labour-Market Information → Meeting an Employer → Matching My Profile → SMART Targets	ASDAN Careers & Experiencing Work + AQA Unit Award
LIVING INDEPENDENTLY	Self-Care & Routines → Home Safety → Laundry & Maintenance → Clean, Safe Space → Personal Admin → Plan & Shop for a Meal	ASDAN Living Independently + AQA Unit Award
VOCATIONAL SKILLS	Intro to Vocational Skills → Health, Safety & Hygiene → Following Instructions → Teamwork → Tools & Safe Use → A Supported Vocational Task	ASDAN Hospitality / Gardening + AQA Unit Award
COMMUNITY & ENTERPRISE	Identify a Need → Plan a Project → Roles, Aims & Timeline → Partner with a Group → Begin Delivering → Promote Our Project	ASDAN Community / Active Citizenship + AQA Unit Award

The Autumn shape is the difference worth noticing: LAUNCH runs six taught modules inside the eight-week half term, where BUILD and GROW teach six weeks and bank in weeks 7–8. The Stretch tier is written to a Level 2 evidence standard — stretch language only, never a Level 2 registration in 2026/27. Everything above stays provisional until the coordinator confirms it with ASDAN.

Using the lessons — and the weekly rhythm

Every session named in this playbook has a ready-made lesson: madebymatt.uk → Lessons → BUILD ASDAN / GROW ASDAN / LAUNCH ASDAN — each strand has a START HERE page and each pathway a hub, a scheme of work and a Resources & Tools page. Lessons run full-screen on the board and follow the same shape, so pupils always know where they are:

- 1. Arrival task** on the board as they walk in — three difficulty tiers, settles the room.
- 2. Model then together:** the teacher models it (“I do”), the class tries it together (“we do”) with tap-reveal and matching games.
- 3. Independent task** — a focused 15 minutes at Supported, Standard or Stretch tier. This is where most evidence is made.
- 4. The Lundy zones** — voice-and-choice stations feeding the slot’s artefact wall.
- 5. Exit check** — three-tier questions proving the learning landed.

From the title slide you can print the whole pack: knowledge organiser, worksheets and scaffolds at all three tiers, exit tickets and a feedback sheet. Every slide carries a TA brief, and a floating dock adds a timer, name picker, noise meter and a one-tap Calm Reset breathing screen.

Golden rules

- Registration before evidence counts — flag unregistered pupils immediately.
- The register tap IS the paperwork — never skip it.
- Evidence in the moment beats reconstruction at the end of term.
- Stretch consistently? That’s a level conversation with your coordinator, not a promise.
- Privacy toggle on when the screen’s on the board; same device every lesson; backup every Friday.
- Credits count the whole course — terms organise, they never reset.
